PROFESSIONAL SUMMARY

Performance-driven Frontend Developer with a background in Statistics, Data Structures, and Algorithms. Experienced in building high-performance, accessible, and responsive web applications using Next.js, React, TypeScript, and Tailwind CSS. Skilled in spec-driven development, algorithm visualization, interactive mapping, and integrating AI services like Google Gemini.

TECHNICAL SKILLS

- **Languages & Core Web:** HTML, CSS, JavaScript, TypeScript, Python, SQL
- **Frameworks & Libraries:** React, Next.js, Vite, Tailwind CSS, Cytoscape.js, Leaflet.js, Syncfusion, Framer Motion, Lucide React, React Icons, Font Awesome
- **Developer Tools & Platforms:** Git, GitHub, Vercel, Netlify, OpenCode, Google AI Studio, Clerk
- **Core Competencies:** Spec-Driven Development, Frontend System Design, Data Structures & Algorithms, Object-Oriented Programming (OOP)
- **Productivity:** Microsoft Excel, Word, PowerPoint

EXPERIENCE

HNG Tech

April 2026 – May 2026

Frontend Developer Intern

- Developed responsive web applications from complex Figma designs within collaborative team environments.
- Engineered a Progressive Web App (PWA) Habit Tracker using Next.js, React, and TypeScript to track daily user streaks.
- Built a custom Chrome Extension leveraging the Google Gemini API to summarize web page content automatically.
- Practiced spec-driven development standards to ensure cross-device compatibility and optimized client performance.

KEY PROJECTS

- **UnilagCompass** [Live Demo](#) — [GitHub](#)
Next.js, React, TypeScript, Leaflet, OpenStreetMap, Lucide React, Tailwind CSS
 - Built a campus navigation web application for University of Lagos students to calculate shortest distances and render optimal routes on interactive maps.
- **React Admin Dashboard** [Live Demo](#) — [GitHub](#)
React, Vite, TypeScript, Syncfusion, Tailwind CSS
 - Created an 18-page enterprise dashboard featuring interactive analytics charts, data tables, schedule calendars, employee/customer management, dynamic theme picking, and dark mode.
- **Minimum Spanning Tree Visualizer** [Live Demo](#) — [GitHub](#)
Next.js, React, TypeScript, Cytoscape.js, Framer Motion, Lucide React, Tailwind CSS
 - Designed an interactive computer science laboratory tool implementing Kruskal's (Union-Find) and Prim's (Min-Heap / Priority Queue) algorithms for graph topology visualization.
- **Locky Supermarket Website** [Live Demo](#) — [GitHub](#)
Next.js, React, TypeScript, Font Awesome, Tailwind CSS
 - Designed and developed a multi-page supermarket platform featuring an interactive storefront, store locator, careers portal, supplier onboarding system, and property acquisition portal.
- **Apex Stock** [Live Demo](#) — [GitHub](#)
HTML, CSS, JavaScript, Dummy JSON API
 - Developed a fully responsive e-commerce application that fetches product data from the Dummy JSON API, featuring dynamic search and filter capabilities with a custom UI.
- **Grandmaster Chess (PWA)** [Live Demo](#) — [GitHub](#)
HTML, CSS, JavaScript, Service Workers
 - Engineered an offline-first Progressive Web App featuring a client-side JavaScript AI chess engine powered by minimax and alpha-beta pruning algorithms.

EDUCATION

University of Lagos

Feb 2022 – Sep 2026

Bachelor of Science (B.Sc.) in Statistics
