Professional Summary

Detail-oriented Frontend Developer with a strong foundation in modern frontend technologies. Experienced in building scalable, responsive web applications and delivering seamless user experiences using React.js and TypeScript. Adept at integrating RESTful APIs, managing complex application state, and writing clean, maintainable, and efficient code. Proven ability to collaborate effectively in remote environments to optimize application performance and ensure cross-browser compatibility.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks	React.js, Next.js, Tailwind CSS (CSS Frameworks), Redux, React Context API, Framer Motion
APIs	RESTful APIs, GraphQL (Basic), JSON, Frontend API Integration
Tools	Git, GitHub, Vite, Netlify, Vercel
Concepts	Responsive Design, State Management, Modular Code Architecture, Cross-Browser Compatibility, Performance Optimization

Experience

Frontend Developer

2022 – Present

Zuper AI

React.js • Next.js • TypeScript • Tailwind CSS • Google Gemini API

- Developed a scalable, AI-powered conversational web application using React.js and TypeScript, prioritizing a seamless and responsive user experience.
- Collaborated with backend services to integrate the Google Gemini RESTful API, effectively managing application state to handle real-time data fetching and context-aware conversations.
- Implemented responsive design principles with modern CSS frameworks to ensure UI compatibility across mobile and desktop devices.
- Live: <https://zuper-ai.vercel.app/>
- Code: <https://github.com/Webkingif/ZuperAI>

Locky Supermarket Platform

React.js • Next.js • Tailwind CSS • TypeScript

- Built a fully responsive multi-page e-commerce platform featuring an interactive storefront, store locator, and dynamic portals using React.js.
- Optimized frontend application state management to ensure smooth animations and data flow across complex user interfaces.
- Wrote clean, production-ready, and maintainable TypeScript code, delivering seamless modular components and cross-browser compatibility.

- Code: <https://github.com/Webkingif/LockySupermarket>

Minimum Spanning Tree Visualizer

React.js • Next.js • TypeScript • Tailwind CSS • Cytoscape.js • Framer Motion

- Engineered a high-performance, interactive algorithm visualizer using React.js and TypeScript to demystify complex computer science concepts.
- Optimized application performance and dynamic rendering logic to handle complex, client-side data visualizations smoothly.
- Employed a strict 'Human-First' UI philosophy, leveraging modern frontend tools and state management to deliver an intuitive, clean, and accessible user interface.
